Request to be Added to “No Spray/Fog” List

Residents may request that their home or farm not be sprayed or fogged as a mosquito control measure. While the Town of Basin cannot guarantee specific buffer distances around a property, staff will make all reasonable efforts to avoid directly or indirectly spraying the identified property.

I understand that adult mosquito control within the City Limits is done by ground spraying. Due to the design of application equipment and the required drift characteristics of these insecticides no guarantee is made that the property will be left insecticide free. I agree to control vegetation and reduce the amount of standing water on or near the property listed below by draining and/or removing it. Signing this paper does not exempt payment of mosquito control fees.

All exclusion requests expire on December 31st of the calendar year in which it was made.

I own or control the property to which this permission applies, described as:

Legal description (if other than normal street address):

This permission is in effect during the 2021 season unless revoked in writing:

DATED: _____

Signature: _____

Printed Name: _____

Address: _____

Telephone: _____
